WARNINGS Read Before Using Your Sega Dreamcast Video Game System

CAUTION

Anyone who uses the Dreamcast should read the operating manual for the software and console before operating them. A responsible adult should read these manuals together with any minors who will use the Dreamcast before the minor uses it.

HEALTH AND EPILEPSY WARNING

Some small number of people are susceptible to epileptic seizures or loss of consciousness when exposed to certain flashing lights or light patterns that they encounter in everyday life, such as those in certain television images or video games. These seizures or loss of consciousness may occur even if the person has never had an epileptic seizure.

If you or anyone in your family has ever had symptoms related to epilepsy when exposed to flashing lights, consult your doctor prior to using Dreamcast.

In all cases, parents should monitor the use of video games by their children. If any player experiences dizziness, blurred vision, eye or muscle twitches, loss of consciousness, disorientation, any involuntary movement or convulsion, IMMEDIATELY DISCONTINUE USE AND CONSULT YOUR DOCTOR BEFORE RESUMING PLAY.

To reduce the possibility of such symptoms, the operator must follow these safety precautions at all times when using Dreamcast:

- Sit a minimum of 6.5 feet away from the television screen. This should be as far as the length of the controller cable.
- Do not play if you are tired or have not had much sleep.
- Make sure that the room in which you are playing has all the lights on and is well lit.
- Stop playing video games for at least ten to twenty minutes per hour. This will rest your eyes, neck, arms and fingers so that you can continue comfortably playing the game in the future.

OPERATING PRECAUTIONS

To prevent personal injury, property damage or malfunction:

- Before removing disc, be sure it has stopped spinning.
- The Sega Dreamcast GD-ROM disc is intended for use exclusively on the Sega Dreamcast video game system. Do not use this disc in anything other than a Dreamcast console, especially not in a CD player.
- Do not allow fingerprints or dirt on either side of the disc.
- Avoid bending the disc. Do not touch, smudge or scratch its surface.
- Do not modify or enlarge the center hole of the disc or use a disc that is cracked, modified or repaired with adhesive tape.
- Do not write on or apply anything to either side of the disc.
- Store the disc in its original case and do not expose it to high temperature and humidity.
- Do not leave the disc in direct sunlight or near a radiator or other source of heat.
- Use lens cleaner and a soft dry cloth to clean disc, wiping gently from the center to the edge. Never use chemicals such as benzene and paint thinner to clean disc.

PROJECTION TELEVISION WARNING

Still pictures or images may cause permanent picture tube damage or mark the phosphor of the CRT. Avoid repeated or extended use of video games on large-screen projection televisions.

SEGA DREAMCAST VIDEO GAME USE

This GD-ROM can only be used with the Sega Dreamcast video game system. Do not attempt to play this GD-ROM on any other CD player; doing so may damage the headphones and/or speakers. GAME TIPS

1. If you take substantial damage from a hit or a volley of hits, you should play more on the defensive side or even back up away from your opponent to give your stamina bar time to recharge. This allows you to not receive another substantial hit that could potentially knock you out.
2. Try not to open yourself to attacks by throwing hit and kicks that you know are not going to hit or just trying to get a couple extra hits in.

3. When you are training a fighter try to make him well rounded in the different types of fighting, such as standing strikes or ground maneuvers. If your character is well rounded, he will have a greater ability to defend himself when he is standing or on the ground.
4. When fighting on the ground, never get into a position where your back is exposed. This is the most dangerous position to be in because it allows your enemy to inflict substantial amounts of damage to you.
5. Wait for your opponent to throw a punch or a kick, dodge the attack then quickly strike him while he is recovering from the attack.
6. If your opponent has you trapped in the corner and is trying to beat you into submission, try to counter the attack and take him to the ground. This will put you at the advantage and allow you to gather your thoughts for a new strategy.
7. Watch your opponent carefully and learn the pattern of their attack. This will help you find the weak point in their technique and overcome their attacks.
8. When you are on the ground and trying to strike your opponent, try to vary your punches to confuse your opponent, making it harder for him to counter your strikes and move into a more dominant position.
9. If your opponent shoots at you and tries to take you down to the mat, try to counter the shoot with a knee to the face or step to the side.
10. Try to hit your opponent with varying attacks. Switching between punches and kicks will confuse your opponent making it harder for them to grab your punches and kicks and forcing you to the ground.
